

CODES FOR SELF-DESIGNATION OF PRACTICE SPECIALTIES ALPHABETICAL BY SPECIALTY

The self-designated practice specialties (SDPS) utilized in the Roster are those recognized by the American Medical Association and do not imply "recognition" or "endorsement" of any field of medical practice. SDPS refers to a self-designated specialty which is not equivalent to nor does it imply ABMS® Board Certification. The fact that a physician chooses to designate a given specialty does not necessarily mean that the physician has been trained or has special competence to practice the SDPS.
