

## Top 2018 MIPS Reporting Registries with Deadlines

**Registry** - A qualified registry is a CMS-approved entity that acts as an intermediary to collect data from MIPS physicians (both individuals and groups) and submits it to CMS on their behalf for purposes of MIPS reporting. Each registry varies from being able to report data for all three of the performance categories (Quality, Advancing Care Information (ACI) and Improvement Activities) to just one or two. Check under the Performance Categories section of each grid for this information.
